

NEW PRODUCT RELEASE

AGATEC A110 Series Interior and General Construction Rotary Laser Levels

Jacksonville, Arkansas, November 1, 2009 – Agatec Construction Laser introduces the A110 series horizontal and vertical self-leveling split beam rotary laser levels. The A110 series lasers provide the end user with professional performance at a truly affordable investment.

The A110 Rotary Lasers are ideally suited for use in a wide variety of interior or exterior applications such as: drop ceilings, electrical installation, alignment applications, general site leveling, grading and many more.

The A110 Series is fully electronically self-leveling in both the horizontal and vertical modes with an accuracy of 3/32" @ 100ft, (2.5mm @ 30m) and a working range of 1000ft in diameter when used with the RCR500 detector. Featuring a Brushless Motor Design, the A110 provides longer product life and also provides for unparalleled battery life at 160hrs with two standard D-Cell batteries. For increased visibility of the laser beam in interior applications, the A110 features a variable length scanning mode which creates a laser chalk-line on any surface. Additionally, the A110 has variable speed rotation which also allows the user to select a rotation speed suitable for the job at hand.

The A110 series laser also provides up to 10% single manual grade in the X-axis when used in either the horizontal or vertical modes. And the vertical mode provides the user with the ability to do squaring and alignment applications without having to use an additional tool. With an environmental rating of IP54 and a One Year Warranty (2nd year free with online product registration), the A110 series rotary laser is the solid choice for today's contractor.

The A110 is available in two packages: The A110 Interior Package and the A110 GC Package. Contact your local dealer for further details.

Quick Specifications	
Accuracy	3/32" @ 100ft, (2.5mm @ 30M)
Working Range	1000ft Diameter with RCR500
Self-Leveling Range	5.7 Degrees (10%)
Variable Speeds	0,150,600 RPM
Scanning Mode	Yes, Variable
H.I. Alert System	Yes
Grade Capabilities	Single Grade Matching ±10%
Battery Life	160hrs on two D-Cell Batteries
Environmental	Weather and Dust Resistant IP54
Warranty	One Year Standard with 2 nd Year available with online registration

AGATEC Construction Lasers is part of a global group of companies with engineering and production worldwide. AGATEC has nearly two decades of experience manufacturing laser products for the construction market. AGATEC offers a full line of rotating, cross line, plumb, pointer and distance measuring tools for the interior, general construction and site preparation markets.
