RE: **New Product Information – DM100 Economy Laser Distance Meter**

NEW PRODUCT ANNOUNCEMENT

AGATEC DM100 – Handheld Laser Distance Meter

Jacksonville, Arkansas, March 10, 2010 – Agatec Construction Lasers introduces the DM100 Hand Held Laser Distance Meter. The DM100 features a two-line LCD display that displays measurements, battery level and calculations. At the touch of a button, the DM100 allows the user to quickly measure linear distances, continuous measurements, areas and volumes. The DM100 features the ability to add and subtract linear measurements thereby reducing errors in manual calculations. The DM100 is the perfect measuring tool for distances over 15ft or where tape measures or conventional measurements cannot easily be used. Just aim the DM100 at a specific target, press a button and instantly the measurement is made.

With an accuracy of $\pm 0.08''$ and a measuring range up to 100ft, the DM100 is the perfect measuring tool for estimators, appraisers, real estate agents and many other professions. Powered by two-AAA batteries, the DM100 will take up to 3000 measurements, and will automatically power off after three minutes of non-use. The DM100 displays measurements in Feet/Inches, Decimal Inches and Metric units and easily converts between different units at the touch of a single button.

The DM100 Laser Distance Meter comes complete with the DM100 Laser, 2-AAA Batteries, Owner's Manual and Carrying Case. Two-Year Warranty.

AGATEC Construction Lasers is part of a global group of companies with engineering and production worldwide. AGATEC has nearly two decades of experience manufacturing laser products for the construction market. AGATEC offers a full line of rotating, cross line, plumb, pointer and distance measuring tools for the interior, general construction and site preparation markets.
